| <b>Fortune Minds India LLP</b><br><i>Software Developer Intern</i>                                                                                                                                                                                                                                                                                                                                                                                              | <i>Feb 2026 – Apr 2026</i> |
| <ul style="list-style-type: none"><li>Developed and maintained web application features using modern JavaScript frameworks.</li><li>Built and integrated frontend components with backend services, improving usability and responsiveness.</li><li>Collaborated with developers to debug issues and enhance application performance.</li><li>Gained experience in real-world development workflows, version control (Git), and deployment practices.</li></ul> |                            |

## Skills

|                     |                                                              |
|---------------------|--------------------------------------------------------------|
| <b>Frontend:</b>    | React.js, JavaScript (ES6+), HTML5, CSS3, Vite, Tailwind CSS |
| <b>Backend:</b>     | Node.js, Express.js, Firebase, MongoDB, SQL, REST APIs       |
| <b>Programming:</b> | C, C++, Java, Python                                         |
| <b>Tools:</b>       | Git, GitHub, Deployment (Vercel)                             |
| <b>Coursework:</b>  | Object-Oriented Programming, Computer Networks, DBMS         |

## Projects

|                                                                                                                                                                                                                                                                                                                                                                 |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>The MindMates</b> — AI-powered mental health platform                                                                                                                                                                                                                                                                                                        |
| <ul style="list-style-type: none"><li>Developed a full-stack mental wellness platform with AI chat, journaling, and scheduling features.</li><li>Implemented responsive UI using React and Tailwind CSS, improving user experience and engagement.</li><li>Integrated backend services using Firebase for real-time data handling and authentication.</li></ul> |
| <b>Codelab.ai</b> — AI chat and real-time co-working platform                                                                                                                                                                                                                                                                                                   |
| <ul style="list-style-type: none"><li>Built a collaborative coding platform with real-time communication and AI chat integration.</li><li>Designed responsive frontend architecture and optimized UI performance for seamless interaction.</li><li>Implemented modular component structure for scalability and maintainability.</li></ul>                       |

## Extra-Curricular Activities

- Student Member — IETE Student Chapter; participated in workshops and technical sessions.
- Active hackathon participant with experience in team-based project development.
- Passionate about creative design, painting, and visual storytelling.

## Certificates

Programming in Java — NPTEL
